

Our home planet is . Just like astronauts need their , Earth needs protection too.

We call our layer of protection the . The atmosphere is quite thin. If the Earth were the size

of an  the atmosphere would be as thin as its skin. The atmosphere might be small,

but it protects , , and  in a big way. The atmosphere protects us from the

blazing, hot  and gives us the air we breathe. Pollution from , , , and

 can make our air dirty. We can protect our home by , , , and more.

The more we learn to protect our planet, the happier we'll be!
